

Life Jacket Awareness

MAST

MARINE and SAFETY TASMANIA
making boating better

Jackets are tested in a swimming pool environment with people wearing bathers only, but what really happens when people end up in the water wearing what they normally would on the boat or while working around the waterfront?

MAST will be doing some simple demonstrations to find out . We will be looking at:

- Yachties with wet weather gear, harnesses and sea boots
- Mums and dads who go flathead fishing
- People from the aquaculture industry
- Tradesmen with steel capped boots, etc.

Spot prizes on offer - thanks to our Sponsors!
